- Vue.js
- React
- HTML / CSS
- Bootstrap / Tailwind

Back-End

- Node.js
- Express
- ASP.NET / C#

Database

- SQL
- MySQL / MS SQL
- NoSQL

Deployment / Cloud Services

- Docker
- AWS EC2
- NGINX

SUMMARY

Aspiring full-stack software developer driven by a passion for crafting web applications across diverse frameworks and programming languages. Quick learner with a proven ability to adapt to new technologies and a track record of developing innovative projects from conception to implementation. Eager to leverage my expertise and indomitable dedication to a dynamic organization.

WORK EXPERIENCE

Walgreens

Customer Service Associate

📅 2019 - 2021

📍 Meridian, ID

- Processed an average of 100 customer transactions daily, managing payments, returns, discounts, and facilitating Western Union transactions while delivering exceptional customer service.
- Managed the assembly of canvases, photos, and posters of various sizes, averaging 50 - 100 pieces per day, ensuring the quality presentation of visual materials.
- Managed and logged the daily drop-off and pickup of FedEx and customer packages, ensuring accurate handling and timely deliveries of hundreds of packages.
- Provided exclusive customer assistance for 70% of all shifts.

Walmart

Stocking and Unloading

📅 2021 - 2023

📍 Meridian, ID

- Worked with a small crew to unload and process daily deliveries of up to 5,000 items, ensuring accurate inventory management and timely stocking.
- Acquired certification for operating specialized electrical equipment to unload and handle pallets of dairy, frozen, and general merchandise items from Walmart delivery trucks.
- Maintained and tracked the inventory of merchandise in backroom, overseeing tens of thousands of items and ensuring accurate stocking, organization, and replenishment.
- Exclusively partnered with team lead to optimize operations, including loading trucks, managing claims, and stocking, reducing team lead's workload by 50%.

PROJECTS

Picture storage and sharing application (Keepr)

<https://keeprclient.onrender.com>

- Crafted an engaging front-end interface with Vue.js, enhancing the user experience.
- Engineered a robust ASP.NET and C# backend API, ensuring secure and efficient data management.

- Designed and delivered comprehensive functionality, enabling users to create, modify, and remove keeps and vaults, streamlining data control.
- Enriched user profiles, allowing seamless editing and sharing with others, fostering an interactive and engaging environment.

Recipe sharing application (All Spice)

<https://allspiceclient.onrender.com>

- Engineered a Vue.js-based responsive UI
- Constructed an ASP.NET backend to support the projects functionality, while leveraging C# for data management through the API.
- Implemented the backend with Dapper and SQL, enabling data manipulation and interaction with the MySQL server database to support seamless project functionality.
- Empowered users to create, customize, and share their own recipes, fostering a personalized cooking experience within the application.
- Created a feature that allows users to mark recipes as favorites and filter them by categories.
- Employed all CRUD (Create, Read, Update, Delete) methods to manage and manipulate data. Responsibly handles all data relationships.

Food storage and Recipe App (Cooking Compass)

<https://github.com/BlazeInGlory/Fridge>

- Collaborated with a team of software developers on a multifaceted project, contributing to the creation of an extensive application.
- Took ownership of 60% of the project's development, focusing on specific modules and functionalities.
- Designed a UML diagram to map out data relationships saving hours of developmental time.
- Contributed to creation of Trello board featuring MVP, Ideal, and Feature-Rich sections, providing a systematic approach to project management.
